

Head of Information Security

As Head of Information Security at Conio, you'll get to work on products that enable Bitcoin and Digital Currencies to millions of people around the world, and pave the way for a new paradigm of money. You will be responsible to ensure the overall security of Conio's products and ecosystem, and will collaborate closely with engineers, operations, design, product and finance to safeguard our organization. This is a key executive role reporting to the CEO office, where hands-on skills, in addition to policy and management, are of paramount importance to this role's success.

Conio is an engineering company. It has been recently [featured in the Libra developer newsletter](#), and has been [the very first crypto company in the world to power the crypto services of a major bank](#). Conio technological prowess has been further recognized through [US patents granted](#) and [major international awards](#).

At Conio, we hire people with a broad set of technical skills who are ready to tackle some of technology's greatest challenges and make an impact on millions, if not billions, of people. But, first and foremost, we look for the raging desire to make a real and concrete impact to world of payments across the globe.

Responsibilities

- Build and develop a top-flight technology security program and team in the areas of information security, product development, and business continuity
- Create company-wide security policy, standards, developmental and behavioral guidelines, and procedures to ensure ongoing maintenance of security
- Develop network access and monitoring policies
- Develop emergency procedures and incident responses around business continuity
- Investigate security incidents and breaches, lead incident response and forensic activities
- Work closely with product development teams to set coding and testing standards to ensure the highest level of security
- Work closely with the DevOps team to set configuration standards to ensure the highest security for servers, storage and network devices
- Influence Conio's security posture and promote activities to create information security awareness throughout the organization

Minimum qualifications

- BS degree in Computer Science or a similar technical field of study, or equivalent practical experience
- 5+ years of professional work experience in an Information Security related position
